STATISTICAL TABLES DESCRIBING THE BACKGROUND CHARACTERISTICS AND RECIDIVISM RATES FOR RELEASES FROM MASSACHUSETTS PRE-RELEASE FACILITIES DURING 1983

GOVERNMENT DOCUMENT
COLLECTION
AUG 6 1986
University of Massachusetts
Depository Copy

Prepared by:

Linda K. Holt
Manager of Operations Research

Massachusetts Department of Correction

Michael V. Fair
Commissioner

March, 1986

PUBLICATION #: 14408-83-250 CR 4/9
Approved by Daniel Carter, State Purchasing Agent

Abstract

This report is the second of two reports on recidivism rates of offenders released from Department of Correction facilities during 1983. Some highlights from this report are:

- The recidivism rate in 1983 was 21%. This is lower than the rates for 1982 (23%) and 1981 (24%).
- The decline in recidivism rates occurred at the same time that the number of releases increased, from 1032 in 1981 to 1221 in 1982 and 1726 in 1983.
- The recidivism rate varied by the security level of the institution from which the offender was released: 28% for maximum, 27% for medium, 20% for minimum, 18% for minimum/pre-release, 14% for state pre-release and 12% for private pre-release.
- The recidivism rate for offenders with no furloughs prior to release was 27% and the recidivism rate for individuals with furloughs prior to release was 10%.
- The recidivism rate for males was 20% and the rate for females was 26%.
- Among males, the recidivism rate was 18% for those serving a Walpole sentence and 21% for those serving a Concord sentence.

Introduction

This report presents a statistical description of offenders released to the street from Massachusetts correctional facilities with a pre-release component during 1983 with corresponding recidivism rates. For purposes of this report, institutions with no pre-release component (maximum, medium and minimum security facilities) are collapsed into the "non-pre-release" category. An earlier report (Number 290) provided the information for all non-pre-release facilities. The statistics are available for maximum security facilities (MCI-Walpole), medium security facilities (MCI-Concord, MCI-Norfolk, MCI-Framingham, SECC and NCCI), minimum security facilities (MCI-Plymouth, MCI-Warwick, Bay State C.C. and N.C.C.), state pre-release facilities (MCI-Shirley, MCI-Lancaster, Boston State PRC, South Middlesex PRC, Park Drive PRC, and Norfolk PRC), three drug rehab programs (Meridian House, Spectrum House and Boston VA Hospital), and seven contract pre-release facilities (Brooke House, Coolidge House, Coolidge II, THP, 577 House, Charlotte House and Hillside PRC). Actually four institutions combine minimum and pre-release. For purposes of these reports MCI-Plymouth and MCI-Warwick are considered minimum, MCI-Shirley and MCI-Lancaster are considered pre-release. A total of 1,726 offenders (1382 males and 344 females) were released from the correctional facilities listed above. The follow-up period is one year from the date of the offender's release to the community. A recidivist is defined as any offender who returns to a state or federal correctional institution, or to a house of correction or jail for 30 days or more and includes parole violators as well as those offenders sentenced for new crimes.

Information contained in this report includes statistics on recidivism rates associated with individual characteristics with regard to release variables, nature of present offense variables, personal background variables,

criminal history variables, furlough participation variables, and release follow-up variables. The tables which follow contain two types of information: (1) statistical data describing characteristics of offenders released from each institution during 1983 and (2) the rates of recidivism by each category of the statistical data for these offenders.

In reading tables in this report, the reader should note the following: (1) the release population is divided according to the institution of release; (2) N represents the number of offenders who fall into the corresponding category in the table; (3) P represents the percentage of the number of offenders in a particular category to the number of offenders released from that institution (column percents); and (4) RR (Recidivism Rate) represents the percentage of offenders in that category who have recidivated. For example, upon referring to the first table on pages 8 and 9, the variable "Type of Release" is presented and the following kinds of information may be obtained: (1) the total number of releases broken down by specific institution is labeled and presented horizontally across the head of the table; (2) the type of release (parole or discharge) is labeled and presented vertically; (3) of the 1,726 offenders released during 1983, 1373 were released on parole (80%) and 353 were released on a discharge (20%); (4) those offenders released from Shirley who were released on parole had a recidivism rate of 20% while those offenders released from Shirley on a discharge had a recidivism rate of 10%.

The material was derived from the computerized data base developed by the Correction and Parole Management Information System (CAPMIS) and was produced on the Regent's Computer Network (RCN).

I. Introduction

This report presents a statistical description of offenders released to the street from Massachusetts facilities with a pre-release component during 1984 with corresponding recidivism rates. The report presents statistics for state pre-release facilities (MCI-Shirley, MCI-Lancaster, Boston State PRC, South Middlesex PRC, Park Drive PRC, and Norfolk PRC), three drug rehab programs (Meridian House, Spectrum House and Boston VA Hospital), and seven contract pre-release facilities (Brooke House, Coolidge House, Coolidge II, THP, McGrath House, Charlotte House and Hillside). For purposes of this report, the Massachusetts Correctional Institutions are collapsed in to the "non-pre-release" category. Statistics for the maximum security facility (MCI-Cedar Junction), medium security facilities (MCI-Concord, MCI-Norfolk, MCI-Framingham, SECC and NCCI), and minimum security facilities (MCI-Plymouth, MCI-Warwick, Bay State C.C. and N.C.C.) are presented in another report (Number 302), along with a description of the recidivism data. Four institutions actually combine minimum and pre-release. In order to be consistent with past recidivism reports, MCI-Plymouth and MCI-Warwick are considered minimum, and MCI-Shirley and MCI-Lancaster are considered pre-release. A total of 1,888 offenders (1,445 males and 443 females) were released from the correctional facilities listed above. The follow-up period is one year from the date of the offender's release to the community. A recidivist is defined as any offender who returns to a state or federal correctional institution, or to a house of correction or jail during the follow-up period for 30 days or more*. This includes parole violators as well as those offenders sentenced for new crimes.

* Offenders serving less than thirty days are excluded from the sample. Inadvertently, 3 cases were included where the time served was less than 30 days. Inclusion of these cases does not affect the recidivism rate.

Information contained in this report includes recidivism rates with regard to release variables, nature of present offense, personal background, criminal history, furlough participation, and release follow-up variables. Each table contains two types of information: (1) statistical data describing characteristics of offenders released from each institution during 1984; and (2) the rates of recidivism cross-tabulated with each of the categories of the statistical data for these offenders.

This report consists solely of statistical tables. In reading these tables, the reader should note the following: (1) the release population is divided according to the institution of release*; (2) N represents the number of offenders who fall into the corresponding category in the table; (3) P represents the percentage of the number of offenders in a particular category to the number of offenders released from that institution (column percents); and (4) RR (Recidivism Rate) represents the percentage of offenders in that category who have recidivated. For example, upon referring to the first table on pages 7 and 8 the variable "Type of Release" is presented and the following kinds of information may be obtained: (1) the total number of releases broken down by specific institution is labeled and presented horizontally across the head of the table; (2) the type of release (parole or discharge) is labeled and presented vertically; (3) of the 1,888 offenders released during 1984, 1,489 (79%) were released on parole and 399 (21%) were released on a discharge; and (4) those offenders released from Lancaster who were released on parole had a recidivism rate of 26% while those offenders released from Lancaster on a discharge had a recidivism rate of 21%.

The material was derived from the computerized data base developed by the Correction and Parole Management Information System (CAPMIS) and was produced on the Regent's Computer Network (RCN).

* When listing the institutions Walpole and Gardner the more commonly used names of "MCI-Cedar Junction" and "NCCI" may be used in some of the tables.

Massachusetts Department of Correction

Michael V. Fair
Commissioner

January, 1988

PUBLICATION #: 15,317-151pp.-250cps.-3-23-88
Approved by Ric Murphy, State Purchasing Agent

Abstract

This report is the first of two reports on recidivism rates of offenders released from Department of Correction facilities during 1985. Some highlights from this report are:

- The recidivism rate in 1985 was 27% This is higher than the rates for 1984 (25%) and 1983 (21%).

- The increase in recidivism rates occurred at the same time that the number of releases increased, from 1,726 in 1983; to 1,888 in 1984; and 1,979 in 1985.

- The recidivism rate varied by security level of the institution from which the offender was released: 36% for maximum, 32% for medium, 28% for minimum, 19% for minimum/pre-release, 19% for state pre-release and 21% for contract pre-release.

- From 1984 to 1985 the recidivism rate for releases from maximum or medium security institutions stayed the same at 32%, while the recidivism rate for releases from lower security facilities increased from 16% in 1984 to 20% in 1985.

- The recidivism rate for males was 26% an increase from the 1984 figure of 24%, and the rate for females was 30% an increase from last year's figure of 29%.

- Among males, the recidivism rate was 27% for those serving a Walpole sentence (compared to 24% for 1984) and 27% for those serving a Concord sentence (compared to 24% for 1984).

- Recidivists were returned for a variety of reasons: 19% for technical parole violations, 48% for a parole violation involving a new arrest, and 32% for re-incarceration on a new offense.

- Offenders released by parole had a higher recidivism rate (29%) than those who were discharged (21%).

- For males, those committed for property offenses had the highest recidivism rate (33%); for females, those committed for "other" offenses had the highest recidivism rate (34%).

- The recidivism rate for those released with no prior adult incarcerations was lower (21%) than for those with a history of one (27%) or more than one (36%) prior adult incarcerations.

- The recidivism rate for offenders with no furloughs prior to release was 31% and the recidivism rate for individuals with one or more furloughs prior to release was 16%.

I. Introduction

This report presents a statistical description of offenders released to the street from Massachusetts correctional facilities during 1985 with corresponding recidivism rates. This report presents statistics for maximum security facilities (MCI-Cedar Junction and Lemuel Shattuck), medium security facilities (MCI-Concord, MCI-Norfolk, MCI-Framingham, SECC and NCCI), minimum security facilities (Bay State C.C and N.C.C.), and three facilities which combine minimum and pre-release populations (MCI-Plymouth, MCI-Warwick and MCI-Longwood). For purposes of this report, institutions with a pre-release component are collapsed into the "other" category. Statistics for two facilities which combine minimum and pre-release (MCI-Shirley and MCI-Lancaster), state pre-release facilities (Boston State PRC, South Middlesex PRC, Park Drive PRC, and Norfolk PRC), two drug rehab programs (Meridian House, and Boston VA Hospital), and seven contract pre-release facilities (Brooke House, Coolidge House, Coolidge II, THP, McGrath House, Charlotte House and Hillside PRC) are presented in another report (Number 322). In order to be consistent with past recidivism reports, MCI-Plymouth, MCI-Warwick, and MCI-Longwood are reported as minimum, and MCI-Shirley and MCI-Lancaster are reported as pre-release.

Information contained in this report includes recidivism rates with regard to release variables, nature of present offense, personal background, criminal history, furlough participation, and release follow-up variables. Each table contains two types of information: (1) statistical data describing characteristics of offenders released from each institution during 1985; and (2) the rates of recidivism cross-tabulated with each of the categories of the statistical data for these offenders.

The writer wishes to acknowledge the significant contributions of Joanne Heliotis, Kathy Bishop, and David Denehey with the collection, coding, and entry of the recidivism data used in this study.

There are two main sections in this report. Section One discusses selected variables in relation to recidivism rates. Where appropriate, comparisons are made between 1984 and 1985 rates. Section Two consists solely of statistical tables. In reading the tables, the reader should note the following: (1) the release population is divided according to the institution of release*; (2) N represents the number of offenders who fall into the corresponding category in the table; (3) P represents the percentage of the number of offenders in a particular category to the number of offenders released from that institution (column percents); (4) R represents the number of offenders who are recidivists; and (5) RR (Recidivism Rate) represents the percentage of offenders in that category who have recidivated. For example, upon referring to the first table on pages 22 and 23, the variable "Type of Release" is presented and the following kinds of information may be obtained: (1) the total number of releases broken down by specific institution is labeled and presented horizontally across the head of the table; (2) the type of release (parole or discharge) is labeled and presented vertically; (3) of the 1,979 offenders released during 1985, 1,395 (70%) were released on parole and 584 (30%) were released on a discharge; and (4) those offenders released from Norfolk who were released on parole had a recidivism rate of 44% while those offenders released from Norfolk on a discharge had a recidivism rate of 22%.

The material was derived from the DOC computerized inmate data base. Additional court record information was collected at the Office of Commissioner of Probation's Research and Planning Department.

---

* When listing the institutions Walpole and Gardner, the more commonly used names of "MCI-Cedar Junction" and NCCI" may be used in some of the tables.

II. Methods

During 1985, a total of 1,979 offenders (1,544 males and 435 females) were released from the correctional facilities listed above after having been incarcerated for at least 30 days. Any offender who was incarcerated for less than 30 days or who was not released to the street (i.e., released to a new sentence at a State, Federal or county facility, or released to and held on a warrant) was excluded from the study*. The follow-up period is one year from the date of the offender's release to the community. A recidivist is defined as any offender who returns to a state or federal correctional institution, or to a house of correction or jail during the follow-up period for 30 days or more. This includes parole violators as well as those offenders sentenced for new crimes.

There was one individual released from Lemuel Shattuck hospital, one released from Hodder House, and two released from Medfield Prison Project. In order to protect the identification of these 4 individuals, in the statistical tables in Section Two of this report the Shattuck and Hodder releases are combined with the Framingham releases (where they were prior to their last move), and the 2 Medfield releases are included in the "other" institution category (which combines all pre-release facilities).

---

* Inadvertently, 1 case was included where the time served was less than 30 days. Inclusion of this case does not affect the recidivism rate.

III. Section One: 1985 Recidivism Rates

Type of Return

Table 1 presents the distribution of types of return for recidivists. Recidivists were returned for a variety of reasons: 19% for a technical parole violation, 48% for a parole violation involving a new arrest, and 32% for re-incarceration to a county house of correction or a Department of Correction facility on a new offense.

The proportions within these categories are very different for male and female offenders. For males, 22% were technical parole violators, 62% were parole violators with a new arrest, 17% were re-committed for a new offense, and one individual was awaiting trial for a new offense.

For females, 12% were technical parole violators, 8% were parole violators with a new arrest, and 80% were re-incarcerated for a new offense.

Time Until Return

Table 2 presents time until return by sex of the recidivist. Of the 525 recidivists in 1985, 50% recidivated within 6 months of their release, 26% between 6 and 9 months, and 24% between 9 months and 1 year.

Females tended to recidivate in a shorter time from their release than males. For example, 29% of the females returned within 3 months, while 19% of the males returned within the same amount of time; 31% of the females returned between 3 and 6 months versus 27% of the males; 18% of the females returned between 6 and 9 months compared to 28% of the males; and 22% of the females returned between 9 months and 1 year versus 25% of the males.

Table 1

Recidivism by Type of Return and Sex

TOTAL	395	(100)	130	(100)	525	(100)

Institution Released From

Table 3 shows the recidivism rate by institution and security level of the institution from which the inmate was released. Releases from maximum security had the highest recidivism rate (36%). Releases from medium security had a lower recidivism rate of 32%. The recidivism rate was the lowest for releases from lower security facilities: minimum (28%), minimum/pre-release (19%), state pre-release (19%), and contract pre-release (21%).

When compared to last year's figures, one finds that the recidivism rate decreased slightly from 37% to 36% for releases from maximum security, increased slightly for releases from medium security (31% vs. 32%), while releases from the lower security facilities stayed the same or increased from last year: minimum (20% vs. 28%), minimum/pre-release (19% vs. 19%), state pre-release (16% vs. 19%) and contract pre-release (14% vs. 21%). Overall, the lower security facilities saw an increase in the recidivism rate from last year (16% in 1984 vs. 20% in 1985).

Furlough Program Participation

Table 4 shows that of those released in 1985, 642 offenders (32%) had participated in the furlough program at least once prior to their release, 609 of which were males. The remaining 68% of those released in 1985 (N = 1,337) had not participated in the furlough program. The recidivism rate was substantially lower for those who had participated in at least one furlough prior to release than it was for those who had not participated (16% vs. 31%).

The recidivism rate also varied by security level of the releasing institution. Offenders released from a maximum or medium security institution who had never been on a furlough, had the highest recidivism rate (34%), while offenders who were released from a lower security facility (minimum or pre-release) and who had been on at least one furlough had the lowest recidivism rate (16%).

Similar trends are apparent when the data are grouped by sex. The recidivism rate was higher for males and females who had not participated in the furlough program, 32% for males and 31% for females. Once again, the recidivism rate decreased as the security level of the releasing institution decreased. For males, the rate was lower if the offender was released from lower security and had participated in the furlough program. The recidivism rate was 36% for males released from maximum or medium security institutions with no prior furlough participation, while for males released from lower security facilities with prior furlough participation the recidivism rate dropped to 15%. Generally, the same pattern held true for females, although the numbers of females who had been on a furlough were very low.

Type of Release

Table 5 shows recidivism rates by type of release and security level of releasing institution. Overall, the recidivism rate was higher for those released on parole (29%) than for those who were discharged (21%). For parolees, those who were first releases (had not been paroled on their present sentence) had a lower recidivism rate (26%) than those who were parole violators (40%). For offenders discharged from their sentence, the recidivism rate was slightly higher for those who were first releases (22%) than for those who were parole violators (19%).

When the data were compared by security level of the releasing institution, the recidivism rate was 35% for first releases paroled from maximum or medium security institutions and 20% for those paroled from lower security institutions who were first releases. For those paroled from higher security who were parole violators, the recidivism rate was 38%, compared to 43% for those paroled from lower security who were parole violators.

The recidivism rate for offenders discharged by expiration of sentence or good conduct discharge was 27% for first releases from higher security and 12% for first releases from lower security. For those who were discharged, but were parole violators, the recidivism rate was 21% for those released from higher security and 16% for those released from lower security.

Table 6 shows recidivism rates by type of release for males and females. The overall recidivism rates are the same as the overall recidivism rates for Table 5, i.e., offenders released by parole have a higher recidivism rate than those released on expiration of sentence or good conduct discharge, and parole violators have a higher or similar recidivism rate to first releases.

Males follow this pattern much more closely than females. Males released by parole had a recidivism rate of

29% and males released by discharge had a recidivism rate of 14%. For both types of release, the recidivism rates were lower for first releases than for parole violators. For females, those released by parole had a lower recidivism rate than those released by discharge 26% vs. 34%. The low number of female parole violators renders a comparison of recidivism rates of parole violators versus first releases useless.

Offender Characteristics

Table 7 shows recidivism rates for male and female offenders by their race, age at release, present offense and prior adult incarcerations. There is an overall pattern found when the data are broken down by sex, that females have a higher rate of recidivism (30%) than males (26%).

The section of the table on recidivism by race and sex shows that overall, Hispanics have the lowest recidivism rate (23%), followed by 26% for whites and 29% for blacks. For males, whites had the lowest recidivism rate and for females, Hispanics had the lowest recidivism rate.

The section on age at release and sex of offender shows that younger offenders generally have a higher rate of recidivism. For males, the rate is lowest in the forty year and older age group (17%) and highest in the 21 year and younger age group (30%) and the 22-25 year age group (27%). For females, the recidivism rate is lowest in the forty year and older age category (0%) and highest in the 22-25 year age category (39%) and the 21 year and younger age category (38%).

In terms of present offense, the recidivism rate was highest in the property offense category (32%), followed by person offenses (28%), "other" offenses (22%), drug offenses (20%), and sex offenses (20%). Males committed for property offenses had the highest rate of recidivism (33%) and those committed for "other" offenses had the lowest rate (8%). Excluding the sex offense category, where the number of cases is too small to make any comparisons, the highest rate of recidivism for females was in the "other" offense category (34%) which includes offenses such as

Prostitution, O.U.I., Disturbing the Peace, Trespassing, and Contempt of Court, and the lowest was in the drug offense category (22%).

The final section of Table 7 on recidivism by prior adult incarcerations and sex of offender reveals a higher recidivism rate for those with a history of one or more prior adult incarcerations than for those with no prior adult incarcerations. Overall, the recidivism rate was 21% for offenders with no prior adult incarcerations versus a 27% recidivism rate for those with one prior adult incarceration and a 36% recidivism rate for those with two or more prior adult incarcerations. This pattern holds true for males and females. For males, those with no prior adult incarcerations had a 21% recidivism rate, while those with one prior adult incarceration or those with more than one prior adult incarceration had higher rates (26% and 34%, respectively). Females with no prior incarcerations had a 22% rate, those with one prior had a 32% rate, and those with more than one prior had a 42% rate of recidivism.

Minimum Security	Bay State Correctional Center Northeastern Correctional Center (NCC) Medfield Prison Project
Minimum/Pre-Release	MCI-Plymouth MCI-Warwick MCI-Shirley MCI-Lancaster Longwood Treatment Center
Pre-Release Facilities	McGrath House (formerly 577 House) Coolidge II (formerly 699 House) Temporary Housing Project Boston State PRC Coolidge House Brooke House South Middlesex PRC Park Drive PRC Lancaster Hillside PRC Norfolk Pre-Release Center Charlotte House
Drug Programs	Meridian House Boston VA Hospital

V. Glossary (continued)

IRH	Institutional Revocation Hearing
PV	Parole Violation
HOC	House of Correction
DOC	Department of Correction
OFFENSE	
Manslaughter	Includes vehicular homicide
Assault - Intent to Murder	Includes assault with intent to murder, attempted murder, and accessory to murder
Armed Assault	Includes assault with intent to rob - being armed, armed assaults in dwelling houses, assault and battery with dangerous weapon, and assault by means of a dangerous weapon
Unarmed Assault	Includes assaults with intent to rob - not being armed, assault, and assault and battery
Other Person	Includes confining or putting in fear a person for the purpose of stealing, mayhem, extortion, and conspiracy

OFFENSE (continued)

Rape of Minor	Includes rape of female under sixteen, and rape of child
Assault w/Intent to Rape of Minor	Includes assault on female under sixteen with intent to commit rape, and indecent assault and battery on child under 14
Unnatural Acts	Includes unnatural and lascivious acts, and sodomy and buggery
Vehicle Theft	Includes theft of a motor vehicle, and use without authority
Prostitution	Includes common night walker, deriving support from prostitute, and prostitution
Weapons Offenses	Includes weapons offenses, and weapons violation
Vehicle Offenses	Includes motor vehicle offenses, and leaving the scene
Contempt of Court	Includes contempt of court, and violation of a court order/violating a restraining order
Other	Includes nonsupport, unlawful possession of alcohol, trespassing, and other.

OFFENSE (continued)

Class A	Includes possession, sale, manufacturing, distribution, dispensing of a Class A controlled substance (Heroin, Morphine) or intent to do any of the above
Class B	Same as for Class A, but for Class B controlled substance (Amphetamines, Barbituates, Cocaine)
Class D	Same as for Class A, but for Class D controlled substance (Marijuana)
Controlled Substance - No Class	Includes possession of narcotic drugs other than heroin with or without intent to sell

I. Introduction

This report presents a statistical description of offenders released to the street from Massachusetts correctional facilities with a pre-release component during 1985 with corresponding recidivism rates. This report presents statistics for two facilities which combine minimum and pre-release populations (MCI-Shirley and MCI-Lancaster), state pre-release facilities (Boston State PRC, South Middlesex PRC, Park Drive PRC, and Norfolk PRC), two drug rehab programs (Meridian House and Boston VA Hospital), and seven contract pre-release facilities (Brooke House, Coolidge House, Coolidge II, THP, McGrath House, Charlotte House and Hillside). For purposes of this report, the Massachusetts Correctional Institutions are collapsed in to the "non-pre-release" category. Statistics for maximum security facilities (MCI-Cedar Junction and Lemuel Shattuck), medium security facilities (MCI-Concord, MCI-Norfolk, MCI-Framingham, SECC and NCCI), minimum security facilities Bay State C.C. and N.C.C.) and three facilities which combine minimum and pre-release populations (MCI-Plymouth, MCI-Warwick and MCI-Longwood) are presented in another report (Number 321), along with a description of the recidivism data. In order to be consistent with past recidivism reports, MCI-Plymouth, MCI-Warwick and MCI-Longwood are reported as minimum, and MCI-Shirley and MCI-Lancaster are reported as pre-release.

* The writer wishes to acknowdedge the significant contributions of Joanne Heliotis, Kathy Bishop and David Denehey with the collection, coding, and entry of the recidivism data used in this study.

Information contained in this report includes recidivism rates with regard to release variables, nature of present offense, personal background, criminal history, furlough participation, and release follow-up variables. Each table contains two types of information: (1) statistical data describing characteristics of offenders released from each institution during 1985; and (2) the rates of recidivism cross-tabulated with each of the categories of the statistical data for these offenders.

This report consists solely of statistical tables. In reading these tables, the reader should note the following: (1) the release population is divided according to the institution of release; (2) N represents the number of offenders who fall into the corresponding category in the table; (3) P represents the percentage of the number of offenders in a particular category to the number of offenders released from that institution (column percents); and (4) RR (Recidivism Rate) represents the percentage of offenders in that category who have recidivated. For example, upon referring to the first table on pages 8 and 9 the variable "Type of Release" is presented and the following kinds of information may be obtained: (1) the total number of releases broken down by specific institution is labeled and presented horizontally across the head of the table; (2) the type of release (parole or discharge) is labeled and presented vertically; (3) of the 1,979 offenders released during 1985, (70%) were released on parole and (30%) were released on a discharge; and (4) those offenders released from Lancaster who were released on parole had a recidivism rate of 27% while those offenders released from Lancaster on a discharge had a recidivism rate of 33%.

The material was derived from the DOC computerized inmate data base. Additional court record information was collected at the Office of Commissioner of Probation's Research and Planning Department.

II. Methods

During 1985, a total of 1,979 offenders (1,544 males and 435 females) were released from the correctional facilities listed above after having been incarcerated for at least 30 days. Any offender who was incarcerated for less than 30 days or who was not released to the street (i.e., released to a new sentence at a State, Federal or county facility, or released to and held on a warrant) was excluded from the study*. The follow-up period is one year from the date of the offender's release to the community. A recidivist is defined as any offender who returns to a state or federal correctional institution, or to a house of correction or jail during the follow-up period for 30 days or more. This includes parole violators as well as those offenders sentenced for new crimes.

There was one individual released from Lemuel Shattuck hospital, one released from Hodder House, and two released from Medfield Prison Project. In order to protect the identification of these 4 individuals, in the statistical tables in Section Two of this report their releases are included in the "other" institution category.

---

* Inadvertently, 1 case was included where the time served was less than 30 days. Inclusion of this case does not affect the recidivism rate.
